DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Claims 5-6 and 11 in Paper filed 10/29/03 is acknowledged.
2. Claims 1-4, 7-10, and 12 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper filed 10/29/03.

Claim Objections

3. Claims 5-6 and 11 are objected to because of the following informalities: Claims 5-6 and 11 are dependent upon non-elected claims. Claims 5-6 and 11 should be presented in independent form. Appropriate correction is required.

References Cited

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kitajima et al., Terashima et al., and Kim et al. are cited as prior art of interest.

Kitajima teaches making a ion-selective electrode complex by scratching longitudinal and lateral grooves into a silver plated support, masking the ends of the silver surface with lateral strips, forming a layer of silver chloride, applying the electrolyte, removing the masking material, then applying the ion selective membranes, and then cutting longitudinally. Kitajima et

al. fails to teach the application of the polymer (masking) stripes in the longitudinal direction and cutting in the lateral direction.

Terashima et al. teaches making an ion-selective electrode by scratching grooves into a silver plated support, masking the ends of the silver surface with lateral strips, forming a layer of silver chloride, applying the electrolyte, and then applying the ion selective membrane.

Terashima et al. fails to teach the application of the polymer (masking) stripes in the longitudinal direction, peeling, cutting in the lateral direction, or forming an electrode complex.

Kim et al. teaches making an ion-selective electrode by forming a layer of silver chloride on a silver plated support, applying the electrolyte, and then applying the ion selective membrane. Kim et al. fails to teach the application of the polymer (masking) stripes in the longitudinal direction, peeling, cutting in the lateral direction, or forming an electrode complex.

Allowable Subject Matter

5. Claims 5-6 and 11 are allowable over the prior art.

6. As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).

7. The following is an examiner's statement of reasons for allowance: None of the prior art cited or reviewed by the examiner, as indicated above, teaches or fairly suggested the claimed methods of making a ion-selective electrode complex, wherein the prior art fails to teach application of the polymer (masking) stripes in the longitudinal direction and cutting in the

lateral direction, such that the complex is formed in accordance with the required electrical contact properties.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

8. This application is in condition for allowance except for the following formal matters:

The above mentioned objection to Claims 5-6 and 11. These claims should be presented in independent form.

The presence of non-elected Claims 1-4, 7-10, and 12. These claims should be canceled.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
